Mississippi Ferries
Bay St. Louis

Vehicles and passengers

Bay St. Louis: Bay St. Louis to Henderson Point

One Ferry: M/V Marissa Mae Nicole operated by Hornblower Marine Services, Mississippi Management Team

Texas Ferries
Galveston-Port Bolivar
150 E. Riverside
Austin, TX 78704

Capacity: approximately 70 vehicles, 500 passengers and six crewmembers. Each ferry is capable of carrying eight 18-wheel trucks weighing 80,000 pounds each.

Galveston Island to Port Bolivar

Five Ferries: The *Gibb Gilchrist* is a traditionally powered and steered vessel. The *R.C. Lanier*, *D.C. Greer*, *Ray Stoker, Jr.* and *R.H. Dedman*, the four newest ferries, employ a "cycloidal propulsion" system. Instead of conventional propellers and rudders, power is obtained from two vertical cycloidal propulsors, one at each end of the boat. This technology allows the ferry to make 360 degree turns or to move sideways with no forward or backward movement. It also allows the Captain to make quicker stops or slow the vessel much more rapidly than conventionally propelled boats.

William Mallini
Operations Manager
Tele: 409-795-2230

Port Aransas
150 E. Riverside
Austin, TX 78704

Capacity: 20 regular passenger vehicles per trip and can transport about 100 vehicles per hour. The maximum length for combined vehicles (such as a car and boat) is 65 feet, the maximum width allowed is 96 inches, the maximum height is 13 feet 6 inches and the maximum gross weight is 80,000 pounds.

The Port Aransas ferry provides travelers on Texas 361 a link across the quarter-mile wide Corpus Christi Channel.

Six Ferries: The six ferry boats are the *William G. Burnett*, *B.L. DeBerry*, *J.C. Dingwall*, *Mark G. Goode*, *R.E. Stotzer, Jr.* and *Arnold W. Oliver*. All named for former Executive Directors of TxDOT.

Howard Gillespie
Tele: 361-749-2852

Los Ebanos

Capacity: Three cars.

The ferry crosses the Rio Grande River from an area of ebony trees (los ebanos) located approximately 14 miles west of McAllen on U.S. 83 and 3 miles south on FM 886. The ferry operates from 8 a.m. to 4 p.m. daily.

The Los Ebanos ferry is the only existing hand-operated ferry on the U.S.-Mexican border. The privately owned and operated ferry carries three cars at a time. In 1975, the ferry was recognized with a state historical marker.

Lynchburg Ferry

Superintendent: David Starett

1001 South Lynchburg

Baytown TX 77520

Phone: 281-424-3521

Capacity: Twelve vehicles

San Jacinto River--Houston Ship Channel

Two Ferries: Todd Shipyard built the William P. Hobby and Ross S. Sterling ferryboats in 1964. Both ferries are 61'8" x 40'5" in length and 8'9" in depth. Their gross weight is 110 tons, and a capacity of 12 vehicles. Depending on the wind, currents, and traffic the ferry takes 7-10 minutes to cross the ship channel.
